

Taha Saadat

Sialkot, Punjab | +92 328 7146225 | tahasaadat680@gmail.com | [LinkedIn](#) | [GitHub](#)

Summary

Computer Science student with hands-on experience developing software applications and solving real-world problems. Skilled in building scalable applications, integrating APIs, and working across the full development lifecycle. Focused on writing clean, efficient code and delivering reliable end-to-end solutions.

Experience

SourceCode Solutions, Lahore - Web Development & UI/UX Design Intern

Jun 2024 - Aug 2024

- Built responsive web interfaces using modern frontend technologies; designed wireframes and prototypes following UI/UX principles.
- Collaborated with cross-functional teams to deliver consistent, accessible, and performant web components aligned with project timelines.

Projects

AgriFusion — Agricultural Intermediary Platform (FYP) *React, Next.js, Supabase, Hugging Face API, Tailwind — 2024*

- Built a multi-stakeholder agricultural platform with a 5-table schema, 8 RESTful JWT-authenticated APIs, and AI-driven soil analysis via Hugging Face with real-time dashboards.

Client Onboarding Automation System

n8n, Google Gemini AI, React, Next.js, MongoDB, Gmail API

- Built a full-stack client onboarding system where client data is collected via a frontend form and validated, with an automated 3-email post-registration pipeline powered by Gemini AI, and a React/Next.js portal with MongoDB and an admin dashboard connected to the n8n automation backend.

Complaint Management System

Django, Python, SQLite, Bootstrap, Chart.js

- Developed a web-based complaint management system featuring secure authentication, complaint submission with file uploads, complaint tracking, and an admin dashboard with analytics for complaint status and priority.

Tomato Leaf Disease Detection — Computer Vision ML Model *PyTorch, ConvNeXtV2, Hugging Face, Gradio, NVIDIA T4*

- Developed a deep learning image classification model (ConvNeXtV2-Base) for 11 tomato disease classes using LDAM-Focal Loss on imbalanced data, deployed on Hugging Face Spaces with a real-time Gradio interface.

Hospital Management System

C#, Oracle Database

- Built a full-featured hospital management system with role-based access (Admin/Doctor/Patient), appointment scheduling, prescription tracking, and PDF report generation.

Self-Supervised Image Representation Learning using MAE

PyTorch, ViT, TinyImageNet, Gradio, Kaggle T4×2

- Implemented a Masked Autoencoder (MAE) with asymmetric ViT-Base encoder and ViT-Small decoder trained on TinyImageNet with mixed precision and dual-GPU support, evaluated via PSNR/SSIM and deployed with Gradio.

Technical Skills

Languages: C++, Python, C#, SQL, JavaScript

Frameworks & Tools: React, Next.js, Supabase, PyTorch, Hugging Face, Gradio, Docker, Django, Bootstrap, Chart.js, n8n

Databases & Cloud: PostgreSQL, Oracle DB, Firebase, SQLite, MongoDB, AWS

Other: Git/GitHub, Visual Studio, WinForms, Google Sheets API, Gmail API

Education

NUCES – FAST, Chiniot-Faisalabad Campus — BS Computer Science

Aug 2022 – Jun 2026

Dean's List Fall 2024 · GPA 3.5

KIPS College Sialkot — Intermediate in Computer Science (ICS)

2022

Honors & Awards

- Dean's List — FAST NUCES (Fall 2024)
- Academic Excellence Award — KIPS College Sialkot (2022), Intermediate (ICS)
- Scholarship Award — KIPS College Sialkot (2021), Outstanding Matriculation Performance
- Excellent Academic Performance Award — Allied School Husnain Campus (2020)
- National Skill Competency Test — 86.5 Percentile, demonstrating strong technical and analytical proficiency
